

## There are fine careers for BOYS in the ROYAL AIR FORCE

1,500 Vacancies for  
Aircraft Apprentices

Aircraft Apprentices in the Royal Air Force are given the finest training a boy can have, with good pay and prospects. A healthy life—sports and games—and three years' training as Fitters, Wireless Operator Mechanics, or Instrument-makers—trades that will always provide a job in civil life.

Candidates for the next Entry in August must be not less than 15 and not more than 17 on the 1st August, 1938. They should have been three or four years at a Secondary, Junior Technical, or Central School, and should get their Schoolmaster to nominate them.

## THE ROYAL AIR FORCE

Air Ministry, Dept. I.R.Y., London, W.C.2.  
Please send me free booklet about Aircraft Apprenticeships.

latest date for  
nominations is  
May 3rd. Exam-  
ination May 31st.  
Post this coupon.  
Your envelope  
need not be  
stamped.

## THE FIRST THING YOU SEE ...

### And the First Wind Indicator in the Right Place

The G.A.L. electrically-operated Wind Indicator shows the direction and strength of Wind by a dense white trail of smoke from the centre of the aerodrome—instantly visible, always reliable. It can be seen from any height and is illuminated at night. It operates from the control building, will run over a week continuously without replenishment for only 1d. an hour—maintenance is nil. If the oil supply should be exhausted, current automatically cuts off. No obstruction to landing—fitted with stressed pit covers. Entirely weatherproof, and will function despite flooding. If electricity is not available, use the G.A.L. flame type Smoke Trail with petrol burner.

Already supplied to the Govt. of the Union of South Africa, Crown Agents for the Colonies, Royal Canadian Air Force, R.A.F.V.R., etc.

## The G·A·L SMOKE TRAIL

General Aircraft Ltd., London Air Park, Feltham, Middx.
